

Digital gauges are used to measure system pressure and thanks to lithium batteries don't need separate power supply. They can measure on 6 different scales and they're available either for positive or negative pressure (for vacuum purposes).

Manomètres digital sont utilisés pour mesurer la pression et grâce aux des batteries au lithium ne nécessitent pas d'alimentations supplémentaires. Il dispose de 6 plages de pression et est prévu pour des pressions positives ou négatives (pour le vide).

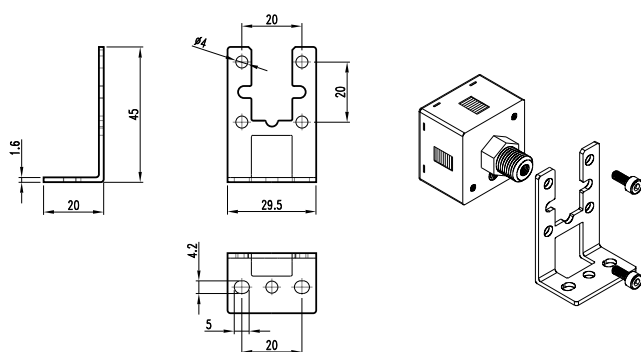

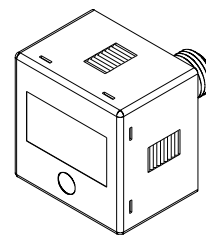

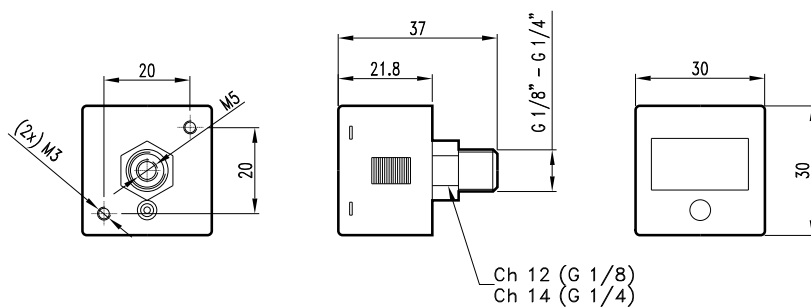

I manometri digitali servono per la misurazione della pressione dell'impianto e grazie all'utilizzo di batteriali al litio non necessitano di alimentazione supplementare. Misurano su 6 diverse scale e sono disponibili per pressione positiva che negativa (vacuum).

STANDARD PRODUCTS / PRODUITS STANDARDS / PRODOTTI STANDARD

Code Code Codice	Type Type Tipo	Thread Filetage Filetto
DM118	gauge / manomètre / manometro	1/8
DM218	vacuum / vide / vuoto	1/8
DM114	gauge / manomètre / manometro	1/4
DM214	vacuum / vide / vuoto	1/4

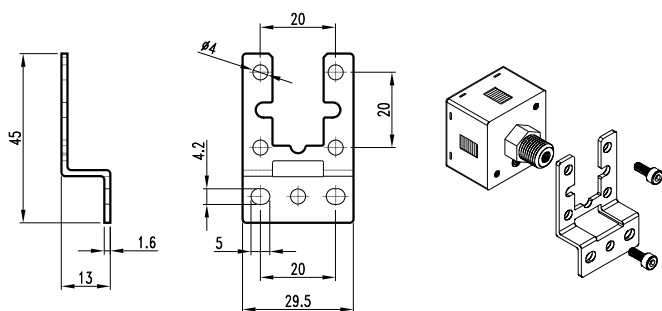

TECHNICAL CHARACTERISTICS / CARACTÉRISTIQUES TECHNIQUES / CARATTERISTICHE TECNICHE

Type Type Tipo		Positive pressure Pression positive Pressioni positive	Vacuum Vide Vuoto
Pressure range/ Pression / Pressione nominale		0 - 10 bar	-1,01 - 0 bar
Max pressure / Max pression / Pressione massima		15 bar	3 bar
Set pressure revolution	kPa	-	1
Set de pression	MPa	0.001	-
Set pressione	kgf/cm2	0.01	-
	bar	0.01	0.01
	psi	0.1	0.01
	mmHg	-	1
Repeatability / Répétabilité / Ripetibilità		< + 0.2% F.S. +1 digit	< + 1% F.S. +1 digit
Fluid / Fluide / fluido	Filtered air, non corrosive, non infiammable gas / Air filtré, non corrosif, ininflammable / aria filtrata, gas non infiammabili		
Current consumption / Consommation de courant / assorbimento	< 40 mA (with no load)		
Temperature range / Température / Temperatura	0 - 50°C		
Environment / Environnement / Classe isolamento	IP65		
Port size / Taille du port / Connessione	1/8/M5 - 1/4/M5		
Weight / Poids / Peso	40 gr
